

Dhiaa Mostafa

Business Automation Developer & Laravel Integration Engineer

Riyadh, Saudi Arabia | 0533166742 | dhiaamostafa46@gmail.com | linkedin.com/in/dhiaamostafa | github.com/dhiaamostafa46

PROFESSIONAL SUMMARY

Business Automation Developer and Laravel Engineer with 5+ years of experience converting manual business processes into automated digital workflows for enterprise clients in Saudi Arabia and the Gulf. Specialized in building workflow automations using n8n and similar tools, developing internal tools, portals, dashboards, and approval systems with Laravel, and integrating ERP, CRM, HR, and third-party platforms via REST APIs and webhooks. Proficient in AI-assisted development using Cursor, GitHub Copilot, and Codex to accelerate delivery. Delivered 500+ enterprise API integrations, scaled a multi-tenant SaaS platform to 7,000+ active users, and consistently reduced manual operational overhead through practical, automation-first engineering.

KEY ACHIEVEMENTS

- Automated 500+ enterprise business workflows by integrating Evix ERP with client systems via REST APIs and webhooks — eliminating manual data synchronization across departments.
- Scaled a multi-tenant SaaS logistics platform to 7,000+ active delivery agents with real-time WebSocket tracking and zero reported downtime during peak operations.
- Built a fully automated HR Management System (payroll, attendance, leave, policy workflows) using Laravel — replacing 100% of manual HR operations.
- Reduced average database query response times by 40%+ via Redis caching, strategic indexing, and query restructuring on high-traffic Laravel applications.
- Delivered 10+ production automation systems across ERP, CRM, HR, logistics, and e-commerce domains using Laravel, n8n-style workflow patterns, and third-party API integrations.

TECHNICAL SKILLS

Automation Tools	n8n, Webhook-driven workflows, Event-based automation, Make / Zapier-compatible patterns
Backend Development	PHP, Laravel, Node.js, Next.js, RESTful APIs, GraphQL, WebSockets, Microservices
Frontend Development	JavaScript, TypeScript, React.js, Bootstrap, Tailwind CSS, HTML/CSS, jQuery, AJAX
API & Integrations	REST APIs, Webhooks, JSON, Third-party integrations (ERP, CRM, HR, Payment Gateways, WhatsApp API)
Databases	MySQL, PostgreSQL, Redis (caching & queues), Elasticsearch
AI-Assisted Dev Tools	Cursor, GitHub Copilot, Codex — used daily to accelerate development and reduce boilerplate
Cloud & DevOps	Docker, Linux, Git/GitHub/GitLab, CI/CD (GitHub Actions, GitLab CI), AWS (EC2, S3, RDS)
Business Systems	ERP, CRM, HR Systems, SaaS Multi-Tenancy, RBAC, Approval Workflows, Reporting Dashboards
Practices	Agile, Scrum, System Design, Documentation, Code Review, Performance Optimization

WORK EXPERIENCE

Senior Business Automation & Integration Engineer

Riyadh, SA | 2023 – Present

Bander Trading Company

- Designed and implemented automated business workflows connecting Evix ERP with 500+ enterprise client systems — replacing manual data entry and synchronization across sales, finance, operations, and HR departments.
- Built internal tools, admin panels, and client portals using Laravel — including approval workflows, reporting dashboards, notification systems, and data synchronization processes.
- Developed a fully automated HR Management System using Laravel: automated payroll processing, attendance tracking, leave management, and configurable approval workflows — eliminating all manual HR operations.

- Integrated payment gateways, WhatsApp API, email automation, and inventory systems across multiple e-commerce platforms using REST APIs and webhooks.
- Architected and launched a multi-tenant SaaS logistics platform (Laravel + sub-domain architecture) scaling to 7,000+ active delivery agents with real-time WebSocket tracking.
- Used AI-assisted coding tools (Cursor, GitHub Copilot, Codex) to accelerate development cycles and automate repetitive coding tasks.
- Established CI/CD pipelines using Docker and GitHub Actions; maintained 99%+ uptime across all enterprise tenants on Linux servers.
- Led ERP & CRM workflow automation, streamlining cross-team business processes and significantly improving operational efficiency.

Full-Stack Automation Developer

Riyadh, SA | 2022 – 2023

Smart System

- Developed and automated operational workflows for Restaurant Management and Hotel Reservation Systems — converting manual booking and ordering processes into automated digital workflows using Laravel.
- Built internal business portals and corporate platforms, managing full SDLC from process analysis to production deployment.
- Integrated third-party APIs and automated data flows between front-end systems and back-end services using RESTful APIs and webhooks.
- Delivered responsive internal dashboards and reporting tools using React, Bootstrap, and Tailwind CSS.

Freelance Automation & API Integration Developer

Remote | 2021 – 2022

Self-Employed

- Delivered custom workflow automation solutions, internal tools, and API integrations for various clients using Laravel, PHP, and modern JavaScript frameworks.
- Converted manual client processes into automated digital systems, improving operational speed and reducing human error.

Full-Stack Developer

Sanaa, Yemen | 2020 – 2021

SKYSOFT

- Developed cross-platform mobile applications (School Management, E-commerce, Hotel Booking) using Flutter, integrated with Laravel/PHP REST API back-ends.
- Maintained high code quality and responsive UI/UX standards within Agile teams.
