

DHIAA MOSTAFA

Integration Lead · Senior Full-Stack Engineer · API & ERP Integration Specialist

📍 Riyadh, KSA | 📞 0533166742 | ✉ dhiaamostafa46@gmail.com | [linkedin.com/in/dhiaamostafa](https://www.linkedin.com/in/dhiaamostafa) | github.com/dhiaamostafa46

PROFESSIONAL SUMMARY

Results-driven Integration Lead and Senior Full-Stack Engineer with 5+ years of experience designing, implementing, and optimizing enterprise system integrations across ERP, CRM, logistics, HR, and e-commerce platforms. Proven track record leading end-to-end integration lifecycle — from architecture design and API management to deployment, monitoring, and cross-functional stakeholder coordination. Delivered 500+ production integrations for enterprise clients across Saudi Arabia, maintaining 99%+ uptime, strict data consistency, and scalable integration architectures. Adept at vendor and third-party system management, integration security, and automation-driven workflow optimization.

KEY ACHIEVEMENTS

- ▶ Led end-to-end integration of Evix ERP with 500+ enterprise clients via RESTful APIs — managing full integration lifecycle including design, testing, deployment, documentation, and ongoing support.
- ▶ Architected and launched a multi-tenant SaaS logistics platform scaling to 7,000+ active delivery agents with real-time WebSocket data synchronization — zero reported downtime during peak load.
- ▶ Optimized database performance and data flow management using Redis caching, strategic indexing, and query restructuring — reducing average API response times by 40%+ on high-traffic endpoints.
- ▶ Designed and implemented enterprise-grade authentication and RBAC systems ensuring strict data isolation, integration security, and compliance across all multi-tenant environments.
- ▶ Established CI/CD pipelines (GitHub Actions + Docker) enabling automated, reliable deployment of integration services with 99%+ production uptime.

TECHNICAL SKILLS

API & Integration	RESTful APIs, GraphQL, WebSockets, API Gateway, API Management, Integration Architecture
Middleware & ERP	Evix ERP, ERP/CRM Integration, Middleware Design, Data Mapping & Transformation
Backend	Laravel/PHP, Node.js, Next.js, Microservices, Clean Architecture
Frontend	React.js, TypeScript, JavaScript, Tailwind CSS, Bootstrap, AJAX
Databases	MySQL, PostgreSQL, Redis (caching & queues), Elasticsearch
Cloud & DevOps	AWS (EC2, S3, RDS), Docker, Kubernetes, GitHub Actions, GitLab CI, Linux
Security	OAuth2, JWT, RBAC, Integration Security & Auth Protocols, Data Governance
Automation	Workflow Automation, Business Process Automation, CI/CD Pipelines
Documentation	Technical Specs, Integration Docs, API Documentation, Workflow Diagrams
Practices	Agile/Scrum, System Design, Vendor Management, Cross-functional Coordination
Mobile	Flutter (iOS & Android)

WORK EXPERIENCE

Integration Lead & Senior Software Engineer · **Bander Trading Company** Riyadh, SA | 2023 – Present
Serving as the primary integration engineer responsible for all system integration initiatives, API management, and cross-platform data synchronization across the organization.

- ▶ Led planning, implementation, and maintenance of Evix ERP integrations with 500+ subscribed enterprise companies — owning the full integration lifecycle from requirements gathering and architecture design through testing, deployment, documentation, and post-launch support.
- ▶ Designed scalable and secure integration architectures using RESTful APIs, ensuring high availability, seamless data synchronization, strict tenant isolation, and seamless data flow across all integrated platforms.
- ▶ Collaborated with Product, Operations, Finance, and external vendors to identify integration requirements, prioritize integration enhancements, and resolve cross-functional dependencies.
- ▶ Monitored integration performance and reliability in real-time; troubleshoot and resolved integration issues across distributed systems with 99%+ uptime maintained throughout.
- ▶ Ensured data consistency and accuracy across all integrated systems through robust data mapping, transformation logic, and automated reconciliation processes.
- ▶ Architected multi-tenant SaaS logistics platform (Laravel + sub-domain architecture) with real-time WebSocket tracking, scaling to 7,000+ active delivery agents with zero-downtime under peak load.
- ▶ Implemented enterprise authentication and RBAC systems complying with security, governance, and data protection requirements across all integration environments.
- ▶ Led automation initiatives via workflow automation and CI/CD pipelines (GitHub Actions + Docker) — eliminating manual processes and improving operational efficiency across teams.
- ▶ Built a comprehensive HR Management System covering automated payroll, attendance tracking, and leave management — a high-impact internal automation initiative.
- ▶ Maintained complete integration documentation, workflows, API specifications, and technical diagrams for all 500+ integration touchpoints.
- ▶ Continuously evaluated new tools and technologies (Redis, Elasticsearch, cloud-native services) to improve integration capabilities and system scalability.

Full-Stack Developer · Smart System

Riyadh, SA | 2022 – 2023

- ▶ Developed and enhanced Restaurant Management Systems and Hotel Reservation Systems, integrating multiple third-party services and payment gateways via RESTful APIs.
- ▶ Built an entrepreneurship platform managing the full SDLC — from system design, API integration, and cross-functional alignment to production deployment.
- ▶ Contributed to integration architecture design, code reviews, and performance optimization across concurrent projects within Agile/Scrum teams.
- ▶ Developed fully responsive UIs (React, Tailwind CSS, Bootstrap) fully integrated with RESTful back-end APIs.

Freelance Software Developer · Self-Employed

Remote | 2021 – 2022

- ▶ Delivered custom API integrations and web applications for various clients — managing client requirements, third-party vendor coordination, and full integration lifecycle.
- ▶ Maintained and upgraded legacy codebases, improving integration security, performance, and data reliability.

Full-Stack Developer · SKYSOFT

Sanaa, Yemen | 2020 – 2021

- ▶ Developed cross-platform mobile apps (Flutter): School Management System, E-commerce Platform, Hotel Booking System — integrated with RESTful APIs and Laravel back-end services.
- ▶ Maintained high code quality and responsive UI/UX standards within Agile teams.

EDUCATION

Bachelor of Information Technology

IBB University, Ibb, Yemen | May 2020
