PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building scalable web applications, REST APIs, and third-party integrations. Proven track record developing event management platforms, booking & reservation systems, and automation workflows. Proficient in Vue.js 3, Node.js, Express.js, MySQL, and Sequelize ORM. Experienced with payment gateway integrations, WhatsApp Business API, Linux/VPS deployment, and Nginx. Delivered production-ready solutions for 500+ enterprise clients including ticketing, QR code check-in, and workflow automation systems.

TECHNICAL SKILLS

Frontend:	Vue.js 3, JavaScript (ES6+), React.js, TypeScript, Tailwind CSS, Responsive & Accessible UI, API Integration
Backend:	Node.js, Express.js, Laravel/PHP, REST APIs, GraphQL, Microservices
Databases:	MySQL, PostgreSQL, Sequelize ORM, Redis (caching & queues), Elasticsearch
Integrations:	WhatsApp Business API, Meta Cloud API, Payment Gateways (Stripe, PayTabs), QR Code & Check-in Systems, Webhook Automation
DevOps:	Linux / VPS Deployment, Nginx, Docker, CI/CD (GitHub Actions), AWS (EC2, S3, RDS)
Tools:	Git, GitHub, Agile/Scrum, Problem Solving & Debugging, Code Reviews
Mobile:	Flutter (iOS & Android)

KEY ACHIEVEMENTS

- ▶ Built REST API integrations for 500+ enterprise clients, ensuring high availability, seamless data sync, and reliable third-party interoperability.
- ▶ Developed multi-vertical event and booking platforms including hotel reservation and restaurant management systems with real-time updates and automated workflows.
- ▶ Implemented QR code check-in and ticketing systems within SaaS platforms serving 7,000+ active users with zero reported downtime.
- ▶ Integrated payment gateways and automated financial workflows, reducing manual processing time and improving transaction reliability.
- ▶ Optimized MySQL database interactions through query restructuring, indexing, and Redis caching — improving response times by 40%+ on high-traffic endpoints.
- ▶ Established CI/CD pipelines with GitHub Actions and Docker, deploying production applications on AWS and Linux/VPS servers, maintaining 99%+ uptime.

WORK EXPERIENCE

Senior Full Stack Developer — **Bander Trading Company** | Riyadh, SA 2023 – Present

- ▶ Designed and maintained multi-tenant SaaS platforms using Laravel and Node.js with REST API integrations for 500+ subscribed enterprise companies, ensuring seamless third-party interoperability.
- ▶ Built and deployed automation workflows connecting ERP systems with external clients — automated data sync, webhook handling, and event-driven processing pipelines.

- ▶ Developed full-stack HR Management and e-commerce systems with responsive Vue.js / React.js frontends and server-side APIs, covering booking, reservation, and inventory management workflows.
- ▶ Integrated payment gateways and implemented QR-code-based validation flows for logistics operations, supporting real-time check-in and tracking for 7,000+ delivery agents.
- ▶ Deployed and maintained production applications on Linux/VPS and AWS (EC2, S3, RDS) using Docker and CI/CD pipelines (GitHub Actions), maintaining 99%+ uptime.
- ▶ Optimized MySQL queries, indexing, and Redis caching, achieving 40%+ improvement in average response times on high-traffic endpoints.

Full Stack Developer — Smart System | Riyadh, SA

2022 – 2023

- ▶ Developed and enhanced Restaurant Management and Hotel Reservation web systems — covering booking flows, availability calendars, and automated notifications via APIs.
- ▶ Built Vue.js / React.js frontends integrated with RESTful backend APIs; implemented responsive, accessible UIs with Tailwind CSS and Bootstrap.
- ▶ Integrated third-party APIs and automation workflows including WhatsApp-based notification systems, payment gateways, and booking engine connectors.
- ▶ Designed and deployed an entrepreneurship platform and multiple corporate websites, managing full SDLC from system design through VPS deployment and Nginx configuration.
- ▶ Participated in Agile/Scrum ceremonies, code reviews, and performance optimization within cross-functional teams.

Freelance Full Stack Developer — Self-Employed | Remote

2021 – 2022

- ▶ Delivered custom web applications and REST API integrations for clients using Node.js, Laravel/PHP, and modern JavaScript frameworks.
- ▶ Built automation solutions and third-party integration workflows (payment APIs, SMS gateways, notification services) for client projects.
- ▶ Maintained and upgraded legacy server-rendered codebases, improving security, performance, and code quality.

Full Stack Developer — SKYSOFT | Sanaa, Yemen

2020 – 2021

- ▶ Developed cross-platform mobile apps (Flutter) for School Management, E-commerce, and Hotel Booking systems — including QR-code scanning, booking flows, and payment integration.
- ▶ Integrated mobile applications with RESTful API backends, maintaining responsive UI/UX standards within Agile teams.

RELEVANT INTEGRATION & AUTOMATION EXPERIENCE

- ▶ **WhatsApp Business API:** WhatsApp Business API: Implemented WhatsApp-based automated notifications within booking and management platforms.
- ▶ **Payment Gateways:** Payment Gateways: Integrated multiple payment providers including Stripe and regional gateways into e-commerce and event platforms.
- ▶ **Booking & Reservation:** Booking & Reservation Platforms: Built hotel reservation and restaurant management systems with full booking lifecycle management.
- ▶ **Workflow Automation:** Automation & Workflow Systems: Designed event-driven data pipelines and webhook-based automation connecting ERP systems with 500+ enterprise clients.
- ▶ **QR & Check-in:** QR Code & Check-in Systems: Implemented QR-code-based check-in and validation flows within SaaS logistics and event platforms.
- ▶ **Ticketing Systems:** Ticketing Systems: Contributed to SaaS ticketing modules including seat/slot management and real-time availability tracking.
