PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years of experience building scalable, high-performance web and mobile applications using React.js and React Native. Proven track record delivering production-grade UIs across ERP, fintech, HR, and payments domains serving 7,000+ active users. Proficient in TypeScript, state management (Redux, Context API), REST and GraphQL API integration, and CI/CD pipeline automation. Experienced with cross-platform mobile development, bilingual (Arabic/English) UI/UX, RTL rendering, and accessibility. Adept at mentoring developers, conducting code reviews, and collaborating with Product, Design, and Backend teams in Agile environments.

KEY ACHIEVEMENTS

- Built and shipped production React and React Native applications across 10+ enterprise projects, covering embedded finance, payments, logistics, and HR domains.
- Delivered responsive, reusable UI component libraries consumed across 500+ enterprise client environments — reducing frontend development time by 30%+.
- Integrated REST APIs and webhook-driven workflows into React frontends across ERP, CRM, and payments systems — validated end-to-end with full negative testing and edge case coverage.
- Achieved 40%+ reduction in query latency on high-traffic Laravel/React applications through systematic performance profiling and optimization.
- Built and maintained CI/CD pipelines (GitHub Actions + Docker) with automated quality gates — achieving 99%+ uptime across multi-tenant SaaS environments.
- Owned Arabic RTL UI/UX quality end-to-end: validated RTL rendering, locale formatting, bilingual copy, and language-switch flows across web and mobile surfaces.

TECHNICAL SKILLS

Frontend: React.js, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3

Mobile: React Native, Flutter, Expo — cross-platform iOS & Android development

Styling: Tailwind CSS, Styled Components, NativeWind, Bootstrap, RTL/LTR layouts

State Management: Redux, Redux Toolkit, Context API, Zustand

APIs & Integration: REST APIs, GraphQL, Apollo Client, OAuth2, webhook integration

Testing: Jest, React Testing Library, React Native Testing Library, Playwright, Cypress, Postman

CI/CD & DevOps: GitHub Actions, GitLab CI, Docker — automated quality gates on every build

Performance: React Profiler, Lighthouse, WebPageTest, k6, JMeter

Backend Familiarity: PHP/Laravel, Node.js — used for white-box API inspection and integration testing

Databases: MySQL, PostgreSQL, Redis — data validation and state verification

AI Tooling: Cursor, GitHub Copilot, Codex — accelerated component generation and edge-case coverage

Languages: Arabic (Native), English (Professional Working Proficiency)

WORK EXPERIENCE

Senior Frontend & Integration Engineer

2023 – Present

Bander Trading Company | Riyadh, SA

- Architected and delivered production React.js frontends for the Evix ERP platform — serving 7,000+ active users across multi-tenant enterprise environments.
- Built scalable, reusable UI component libraries in React and TypeScript consumed by 500+ enterprise clients — enforcing design system consistency and ADA/RTL compliance.
- Integrated RESTful APIs, WebSocket connections, and webhook-driven workflows (payment gateways, WhatsApp API, inventory sync) into React frontends.
- Managed state with Redux and Context API across complex multi-step approval workflows and real-time concurrent session handling on a logistics platform.
- Built automated regression suites (Playwright, Cypress) and wired them into GitHub Actions CI/CD pipelines — enabling continuous quality gates on every build.
- Owned Arabic language quality end-to-end: validated RTL rendering, bilingual UI copy, error messages, and locale formatting across web and mobile surfaces.
- Used AI tooling (Cursor, GitHub Copilot, Codex) to accelerate component generation, test case synthesis, and edge-case coverage.
- Collaborated with Product and Design squads to define acceptance criteria and UI requirements before development started — embodying shift-left quality principles.

Full-Stack Frontend Developer

2022 – 2023

Smart System | Riyadh, SA

- Developed and tested React.js frontends for Restaurant Management and Hotel Reservation systems — full functional, regression, and integration test coverage.
- Built responsive, cross-device internal dashboards in React — validated across mobile and desktop with accessibility and non-functional requirements testing.
- Authored and executed test plans across web and mobile surfaces; validated Arabic RTL rendering, bilingual UI flows, and locale-specific formatting.
- Integrated third-party API test suites into CI/CD pipelines; conducted API contract testing using Postman and React Testing Library.

Freelance Frontend & API Integration Developer

2021 – 2022

Self-Employed | Remote

- Delivered end-to-end frontend development for custom workflow automation and API integration projects — including React component development, API testing with Postman, and regression testing.
- Validated data integrity across automated pipelines; authored Arabic and English documentation for client handover.

Mobile & Full-Stack Developer

2020 – 2021

SKYSOFT | Sanaa, Yemen

- Developed and tested cross-platform mobile applications (School Management, E-commerce, Hotel Booking) using Flutter — validated RTL Arabic interfaces and REST API integration.
- Built React-based web frontends and validated API integration across Flutter mobile and web surfaces.

EDUCATION

Bachelor of Information Technology

May 2020

IBB University, Yemen

LANGUAGES

Arabic — Native **English** — Professional Working Proficiency
