

DHIAA MOSTAFA

Senior Technical Lead · Full-Stack Engineering · Microservices Architecture

📍 Riyadh, KSA | 📞 0533166742 | ✉ dhiaamostafa46@gmail.com | [linkedin.com/in/dhiaamostafa](https://www.linkedin.com/in/dhiaamostafa) | github.com/dhiaamostafa46

PROFESSIONAL SUMMARY

Senior Technical Lead and Full-Stack Engineer with 5+ years of end-to-end product delivery on shared microservices platforms — spanning backend, frontend, and mobile — and a strong track record of leading cross-functional squads, owning architecture decisions, and shipping at scale. Hands-on technical leader who drives engineering quality (PR standards, branching discipline, test coverage, migration safety), translates product roadmaps into sequenced engineering work, and stays deeply involved in critical-path code, incident response, and root-cause analysis. Experienced with multi-tenant SaaS, ERP integrations, real-time systems, performance optimization, and CI/CD automation across enterprise environments.

KEY ACHIEVEMENTS

- ▶ Led cross-functional engineering as sole integration and platform architect at Bander Trading Co. — owning backend, frontend, mobile (Flutter), and DevOps delivery across 10+ concurrent production systems.
- ▶ Architected and shipped a multi-tenant SaaS logistics platform scaling to 7,000+ active delivery agents with real-time WebSocket tracking — zero reported downtime during peak operations.
- ▶ Owned end-to-end technical delivery of Evix ERP integrations across 500+ enterprise clients — architecture design, squad coordination, deployment, documentation, and incident response.
- ▶ Drove 40%+ API response time improvement through Redis caching, strategic indexing, and query restructuring — hands-on performance engineering on high-traffic production endpoints.
- ▶ Established CI/CD pipelines (GitHub Actions, Docker) with branching and deployment discipline, maintaining 99%+ production uptime across all multi-tenant environments.

TECHNICAL SKILLS

Backend	Node.js, NestJS, Laravel/PHP, RESTful APIs, GraphQL, WebSockets, Microservices, API Gateway
Frontend	TypeScript (strict), React.js, Next.js (App Router, SSR/ISR), MUI, Tailwind CSS, JavaScript
Databases	PostgreSQL (schema design, indexing, query optimisation), MySQL, Redis, Elasticsearch, Sequelize ORM
Cloud & DevOps	AWS (EC2, S3, RDS), Azure (Container Apps, App Services, Function Apps, Service Bus, Storage Blob), Docker, Kubernetes
CI/CD	GitHub Actions, GitLab CI, Azure DevOps Pipelines, ACR, automated build → deploy workflows, cherry-pick discipline
AI Integration	Azure OpenAI (chat, embeddings), prompt design, structured JSON response_format, retries/fallbacks
Search	Elasticsearch (mappings, aggregations, dashboards), Azure AI Search
Architecture	SaaS Multi-Tenancy, Microservices, NestJS monorepos (apps + libs), Clean Architecture, RBAC, ERP Integration
Queue & Async	Redis Queues, BullMQ, async job processing, event-driven architecture
Mobile	Flutter (cross-platform iOS & Android)
Practices	Squad Leadership, Sprint Planning, PR Reviews, Performance Management, Incident Response, Post-mortems, Agile/Scrum

WORK EXPERIENCE

Senior Technical Lead & Integration Architect · Bander Trading Company *Riyadh, SA | 2023 – Present*

Cross-functional technical lead owning architecture, delivery, and engineering quality across backend, frontend, and mobile product areas on a shared microservices platform.

- ▶ Led cross-functional squad delivery across backend, frontend, and mobile — running sprint planning, architecture reviews, PR reviews, and performance management as the sole platform tech lead.
- ▶ Owned architecture decisions for multiple product areas including the multi-tenant logistics SaaS, ERP integration layer, HR management system, and e-commerce verticals — partnering with stakeholders on platform-wide platform concerns.
- ▶ Set and enforced engineering quality bars: PR review standards, branching / deployment discipline between QA and production, migration safety, and incident response protocols.
- ▶ Drove technical roadmap delivery — breaking down product requirements into sequenced engineering work, estimating, prioritizing, and shipping consistently across all product areas.
- ▶ Hands-on on critical paths: wrote code for high-risk features, prototyped architectural changes, shipped hotfixes under production pressure, and personally resolved performance bottlenecks.
- ▶ Ran incident response for production issues — root-cause analysis, post-mortems, and prevention measures across all integrated systems with 99%+ uptime maintained.
- ▶ Architected multi-tenant SaaS logistics platform (microservices + sub-domain architecture) with real-time WebSocket tracking — scaling to 7,000+ active delivery agents, zero downtime.
- ▶ Led end-to-end ERP integration with 500+ enterprise clients via RESTful APIs — managing data mapping, transformation, synchronization, and full integration lifecycle.
- ▶ Optimized database performance (Redis caching, strategic indexing, query restructuring) — 40%+ reduction in API response times on high-traffic production endpoints.
- ▶ Established CI/CD pipelines (GitHub Actions + Docker) for automated build, test, and deployment workflows; managed branching strategy and environment promotion discipline.
- ▶ Built HR Management System with automated payroll, attendance, and leave management; delivered multi-vertical e-commerce platforms with payment gateway integrations.
- ▶ Implemented RBAC and enterprise authentication systems with strict data isolation, security governance, and compliance across all multi-tenant environments.

Full-Stack Developer · Smart System

Riyadh, SA | 2022 – 2023

- ▶ Contributed to architecture design and engineering quality standards across concurrent projects in Agile/Scrum squads — running code reviews and performance optimization.
- ▶ Developed and enhanced Restaurant Management Systems and Hotel Reservation Systems — full-stack Laravel + React with third-party API integrations and payment gateways.
- ▶ Built entrepreneurship platform managing full SDLC: system design, backend APIs, frontend, and production deployment.
- ▶ Delivered responsive UIs (React, TypeScript, Tailwind CSS, Bootstrap) fully integrated with RESTful back-end services.

Freelance Software Developer · Self-Employed

Remote | 2021 – 2022

- ▶ Delivered custom web applications and API integrations independently — owning requirements analysis, architecture, development, and client delivery end-to-end.
- ▶ Maintained and upgraded legacy codebases, improving security, reliability, and performance across multiple production systems.

Full-Stack Developer · SKYSOFT

Sanaa, Yemen | 2020 – 2021

- ▶ Developed cross-platform mobile applications using Flutter (iOS & Android): School Management System, E-commerce Platform, Hotel Booking System — integrated with RESTful API and Laravel back-end.
- ▶ Maintained code quality, responsive UI/UX standards, and Agile delivery discipline within a structured engineering team.

EDUCATION

Bachelor of Information Technology

IBB University, Yemen | May 2020
