

Dhiaa Mostafa

Software Engineer | Systems Analysis & Design | ERP & Business Systems Solutions | Database Design | API Development & Systems Integration

Riyadh, Saudi Arabia | 0533166742 | dhiaamostafa46@gmail.com | linkedin.com/in/dhiaamostafa | github.com/dhiaamostafa46

PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience spanning the full software development lifecycle — from systems analysis and requirements gathering to the design and delivery of enterprise business solutions, ERP systems, and large-scale web platforms. Proven track record in relational database design, RESTful API development, and systems integration across ERP, CRM, payment gateway, and logistics platforms supporting 500+ enterprise clients. Experienced working across diverse technology stacks (PHP, Laravel, Node.js, React.js, Next.js, TypeScript) and managing technical projects through complete SDLC stages, with consistent results in system performance optimization (40%+ response-time improvements) and operational reliability (99%+ uptime).

KEY ACHIEVEMENTS

- ▶ Led systems analysis and architecture design for enterprise integration solutions connecting Evix ERP with 500+ enterprise clients — encompassing ERP, CRM, payment gateway, and logistics system integrations via RESTful APIs.
- ▶ Designed and built a multi-tenant SaaS business platform (e-commerce & logistics) scaling to 7,000+ active users, including database schema design and real-time data synchronization — zero reported downtime during peak operations.
- ▶ Improved system performance and technical efficiency by 40%+ through database optimization (strategic indexing, query restructuring) and caching architecture design (Redis).
- ▶ Directed full-cycle development of multi-vertical business applications with integrated payment processing and inventory management systems across medical, security, and charitable sectors.
- ▶ Delivered 10+ end-to-end production systems spanning ERP, CRM, HR, logistics, and e-commerce domains — owning technical requirements, system design, and deployment over a 5+ year span.

CORE COMPETENCIES

Systems Analysis & Design: Requirements gathering, business process analysis, system architecture design, SDLC management, technical documentation, technical consultation

ERP & Business Systems: ERP integration (Evix ERP), CRM platforms, payment gateway systems, logistics platform integration, HR & payroll systems

Database Design & Management: MySQL, PostgreSQL, Redis, Elasticsearch — schema design, indexing, normalization, query optimization

API Development & Systems Integration: RESTful APIs, GraphQL, WebSockets, Microservices, third-party/enterprise system integration

Application Development: PHP, Laravel, Node.js, JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, SASS

Performance & Technical Optimization: Caching strategy design, query/load optimization, technical efficiency benchmarking, high-traffic system tuning

Cloud, DevOps & Project Delivery: AWS (EC2, S3, RDS), Docker, CI/CD (GitHub Actions, GitLab CI), Git, Linux, Agile/Scrum, Code Review

Mobile Application Development: Flutter (cross-platform iOS & Android)

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer · Bander Trading Company — *Riyadh, SA* **2023 – Present**

- ▶ Conduct systems analysis and architecture design for a multi-tenant SaaS business platform (e-commerce & logistics), scaling to 7,000+ active users with real-time data synchronization via WebSockets.

- Design and develop RESTful API solutions for ERP integration (Evix ERP) with 500+ enterprise clients, ensuring system interoperability, data integrity, and strict tenant isolation.
- Lead integration of enterprise systems — ERP platforms, CRM solutions, payment gateways, and logistics providers — via API-based architecture.
- Architect database schemas and optimize relational data models for multi-vertical business applications spanning medical, security, and charitable sectors.
- Designed and delivered a comprehensive HR Management System covering payroll automation, attendance tracking, leave management, and configurable business-rule workflows.
- Improve system performance and technical efficiency by 40%+ through caching architecture (Redis), database indexing, and query optimization on high-traffic systems.
- Implement enterprise-grade security architecture (Role-Based Access Control) ensuring data isolation and compliance across multi-tenant environments.
- Establish CI/CD pipelines and DevOps practices (GitHub Actions, Docker) for automated testing and deployment — maintaining 99%+ system uptime.
- Maintain technical documentation and system specifications, and provide technical consultation to stakeholders across all platform components.

Full Stack Developer · Smart System — *Riyadh, SA*

2022 – 2023

- Designed and developed business management systems (Restaurant Management and Hotel Reservation Systems), improving operational workflows through systems analysis and process optimization.
- Led system design and full SDLC delivery for an entrepreneurship platform and multiple corporate business websites — from requirements analysis to production deployment.
- Built responsive web application interfaces integrated with RESTful back-end APIs, across concurrent Agile/Scrum projects.
- Contributed to platform architecture design, technical code reviews, and performance optimization initiatives.

Freelance Full Stack Developer · Self-Employed — *Remote*

2021 – 2022

- Delivered custom business applications and third-party API integrations for diverse clients, applying systems analysis to translate business requirements into technical solutions.
- Maintained and modernized legacy systems, improving security architecture, reliability, and overall system performance.

Full Stack Developer · SKYSOFT — *Sanaa, Yemen*

2020 – 2021

- Developed cross-platform mobile application systems (School Management, E-commerce, Hotel Booking) using Flutter, demonstrating versatility across multiple platforms and frameworks.
- Integrated mobile systems with RESTful APIs and backend services, contributing to system design and maintaining high code quality within Agile teams.

EDUCATION

Bachelor of Information Technology — IBB University, Yemen | May 2020

LANGUAGES

Arabic — Native English — Professional Working Proficiency
