PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 5+ years architecting and independently driving the technology strategy behind enterprise-grade ERP integrations, multi-tenant SaaS platforms, and high-traffic web applications. Functioned as sole technical decision-maker for integration architecture, framework selection, and cloud infrastructure on systems serving 500+ enterprise clients and 7,000+ active users. Strong background in translating business requirements into scalable engineering solutions, owning full SDLC delivery, and collaborating cross-functionally with stakeholders. Hands-on experience with AWS and GCP cloud environments, microservices, CI/CD automation, and Agile/Scrum delivery practices.

KEY ACHIEVEMENTS

- Acted as sole Integration Lead, owning technology selection and end-to-end delivery of Evix ERP integrations across 500+ enterprise clients via RESTful APIs (ERP, CRM, payment gateway, and logistics connections).
- Architected and scaled a multi-tenant SaaS e-commerce and logistics platform to 7,000+ active users with real-time tracking, independently selecting the technology stack (Laravel, React.js, Redis, Docker) and infrastructure approach — zero reported downtime during peak operations.
- Drove a performance optimization strategy that reduced average API response times by 40%+ through Redis caching, strategic SQL indexing, and query restructuring on high-traffic Laravel applications.
- Defined and implemented enterprise-wide RBAC and multi-tenant security architecture, ensuring strict data isolation across all client environments.
- Established CI/CD pipelines and DevOps standards (GitHub Actions, Docker), raising deployment reliability to 99%+ uptime across all production environments.
- Delivered 10+ production systems spanning ERP, CRM, HR, logistics, and e-commerce domains, owning architecture and technology decisions from concept through deployment.

TECHNICAL SKILLS

Leadership & Strategy: Technology Strategy & Selection, Solution Architecture, Agile/Scrum, Project Management, Cross-Functional Collaboration, Stakeholder Communication, Technical Documentation

Front-End: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, TypeScript, Tailwind CSS, Bootstrap, SASS, AJAX, jQuery

Back-End: PHP, Laravel, Node.js, RESTful API Development, GraphQL, WebSockets, Microservices

Integrations: ERP Systems, CRM Platforms, Payment Gateways, Logistics Providers, Third-Party APIs

Databases: MySQL, PostgreSQL, Redis (caching & queues), Elasticsearch — schema design, indexing, query optimization

Cloud & DevOps: AWS (EC2, S3, RDS), GCP, Docker, Kubernetes, CI/CD (GitHub Actions, GitLab CI), Git, Linux

Practices: Agile/Scrum, Code Review, Quality Assurance, Performance Optimization, KPI & Technical Documentation, SDLC

Mobile: Flutter (iOS & Android cross-platform)

WORK EXPERIENCE

Senior Full-Stack Engineer & Integration Lead — Bander Trading Company

Riyadh, SA | 2023 – Present

- Operate as the company's sole Integration Lead, owning the technology strategy, architecture, and full delivery lifecycle for the Evix ERP integration program serving 500+ enterprise clients.
- Built and maintained a multi-tenant SaaS e-commerce and logistics platform (Laravel + React.js) scaling to 7,000+ active users with real-time WebSocket tracking — making key infrastructure and reliability decisions under high-traffic load.
- Designed and developed scalable back-end services and RESTful APIs for ERP integration, ensuring high availability, seamless data synchronization, and strict tenant isolation.
- Selected and integrated third-party systems including ERP platforms, CRM solutions, payment gateways, and logistics providers via RESTful APIs.
- Developed multi-vertical e-commerce platforms with secure payment gateway integration and inventory management systems across multiple business domains.
- Built a comprehensive HR Management System covering automated payroll processing, attendance tracking, leave management, and configurable policy workflows.
- Optimized application performance using Redis caching, strategic SQL indexing, and query restructuring — improving API response times by 40%+ on high-traffic endpoints.
- Implemented enterprise authentication with Role-Based Access Control (RBAC), ensuring strict data isolation and security across all multi-tenant environments.
- Established CI/CD pipelines using GitHub Actions and Docker for automated testing and deployments; maintained 99%+ uptime across all production environments.
- Owned technical documentation and development standards across all platform components.

Full Stack Developer — Smart System

Riyadh, SA | 2022 – 2023

- Developed and enhanced Restaurant Management Systems and Hotel Reservation Systems using Laravel + React.js, improving operational workflows and booking efficiency.
- Designed and built an entrepreneurship platform and multiple corporate business websites, managing full SDLC from system design to production deployment.
- Built fully responsive, user-friendly front-end interfaces using React.js, Next.js, Tailwind CSS, and Bootstrap, integrated with RESTful back-end APIs.
- Contributed to platform architecture design, code reviews, and performance optimization across concurrent Agile/Scrum projects.

Freelance Full Stack Developer — Self-Employed

Remote | 2021 – 2022

- Delivered custom web applications and third-party API integrations for various clients using Laravel, PHP, React.js, and modern JavaScript frameworks.
- Maintained and upgraded legacy codebases, improving security, reliability, and system performance.

Full Stack Developer — SKYSOFT

Sanaa, Yemen | 2020 – 2021

- Developed cross-platform mobile applications using Flutter: School Management System, E-commerce Platform, and Hotel Booking System.
- Integrated mobile applications with RESTful APIs and Laravel/PHP back-end services within Agile teams, maintaining high code quality and responsive UI standards.

EDUCATION

Bachelor of Information Technology — IBB University, Yemen | May 2020

LANGUAGES

Arabic — Native | English — Professional Working Proficiency
