

Dhiaa Mostafa

Senior Full-Stack Engineer & Technical Lead

Riyadh, Saudi Arabia · 0533166742 · dhiaamostafa46@gmail.com · linkedin.com/in/dhiaamostafa · github.com/dhiaamostafa46

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer and Technical Lead with 5+ years delivering high-traffic, scalable web platforms using PHP Laravel and React.js. Proven track record leading development teams, architecting multi-tenant SaaS systems, and integrating complex APIs — serving 500+ enterprise clients, 7,000+ active users, with 40%+ performance improvements and 99%+ uptime. Deep expertise in backend architecture, frontend implementation, database optimization (MySQL, PostgreSQL, Redis, MongoDB), and end-to-end technical ownership from requirements through production.

TECHNICAL SKILLS

Backend & APIs Gateway	PHP, Laravel (5+ yrs), Node.js, RESTful APIs, GraphQL, WebSockets, Microservices, API
Frontend	React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML/CSS, Contentful CMS
Databases	MySQL, PostgreSQL, MongoDB, Redis (caching & queues), Elasticsearch
Cloud & DevOps	AWS (EC2, S3, RDS), Docker, GitHub Actions, GitLab CI, Linux
Architecture	SaaS Multi-Tenancy, Microservices, Clean Architecture, RBAC, ERP/CRM Systems
Leadership	Technical Vision, Team Mentoring, Code Review, Agile/Scrum, SDLC, System Design
Mobile	Flutter (cross-platform iOS & Android)

KEY ACHIEVEMENTS

- ▶ Scaled multi-tenant SaaS platform to 7,000+ active delivery agents with real-time React + WebSocket dashboards
- ▶ Led Evix ERP API integrations for 500+ enterprise clients — full ownership from architecture to production
- ▶ Improved average API response times by 40%+ via Redis caching, strategic indexing & query optimization
- ▶ Delivered 10+ production systems (ERP, CRM, HR, e-commerce, logistics) within 5 years
- ▶ Maintained 99%+ uptime across all enterprise multi-tenant environments

WORK EXPERIENCE

Senior Full-Stack Engineer & Technical Lead

2023 – Present

Bander Trading Company · Riyadh, SA

- ▶ Architected and launched a multi-tenant SaaS logistics platform (Laravel + React.js + subdomain architecture), scaling to 7,000+ active delivery agents — full-stack ownership from backend APIs to real-time WebSocket dashboards.
- ▶ Led end-to-end technical direction for Evix ERP integrations with 500+ enterprise companies: defined architecture, assigned tasks, reviewed code, and ensured high availability and tenant data isolation.
- ▶ Built a full-featured React.js frontend for the ERP platform, implementing complex UI workflows, real-time data updates, and role-based interface controls.
- ▶ Designed and integrated Contentful CMS-backed content layers for marketing and operational portals — enabling non-technical teams to manage content independently.
- ▶ Engineered a comprehensive HR Management System: automated payroll, attendance, leave management, and configurable policy engine — replacing all manual HR operations.
- ▶ Optimized backend performance using Redis caching, strategic indexing, and query restructuring — improving average API response times by 40%+ on high-traffic endpoints.
- ▶ Implemented enterprise RBAC and security architecture ensuring strict data isolation across all multi-tenant environments.
- ▶ Established CI/CD pipelines (GitHub Actions + Docker) for automated deployments; maintained 99%+ uptime across all production tenants.
- ▶ Developed multi-vertical e-commerce backends (medical lenses, security cameras, charitable orgs) with payment gateway integration and inventory management.

Full-Stack Developer

2022 – 2023

Smart System · Riyadh, SA

- Developed full-stack Laravel + React solutions for Restaurant Management and Hotel Reservation Systems — improving booking efficiency and operational workflows.
- Designed and built API and frontend layers for an entrepreneurship platform and corporate websites — managing full SDLC from system design to production deployment.
- Led code reviews, backend architecture decisions, and performance optimization across concurrent Agile/Scrum projects.

Freelance Full-Stack Developer

2021 – 2022

Self-Employed · Remote

- Delivered custom backend API integrations and React-based web applications for various clients using Laravel, PHP, and Node.js.
- Maintained and upgraded legacy codebases — improving security, stability, and overall system performance.

Backend Developer

2020 – 2021

SKYSOFT · Sanaa, Yemen

- Developed RESTful API backends in Laravel/PHP for cross-platform mobile apps: School Management System, E-commerce Platform, and Hotel Booking System.
- Integrated mobile apps with backend services; maintained high code quality and API performance standards within Agile teams.
