

Dhiaa Mostafa

Full-Stack Web Developer | Laravel/PHP & React.js | RESTful & GraphQL APIs | MySQL

Riyadh, Saudi Arabia | 0533166742 | dhiaamostafa46@gmail.com | linkedin.com/in/dhiaamostafa | github.com/dhiaamostafa46

PROFESSIONAL SUMMARY

Full-Stack Web Developer with 5+ years of experience designing, developing, and maintaining secure, scalable, and user-friendly web applications using the Laravel/PHP stack (MVC architecture) and React.js. Skilled in building and consuming RESTful and GraphQL APIs, integrating third-party services, and creating responsive, accessible front-end interfaces with Bootstrap and Tailwind CSS. Experienced with server-side rendering and MVC templating patterns (Laravel Blade), relational database design and query optimization (MySQL, PostgreSQL), version control with Git, and Agile/Scrum delivery (sprint planning, stand-ups, retrospectives) — serving 500+ enterprise clients, managing systems with 7,000+ active users, improving performance by 40%+, and maintaining 99%+ uptime in production.

KEY ACHIEVEMENTS

- Designed and built a multi-tenant SaaS web platform (Laravel MVC architecture) supporting 7,000+ active users with real-time updates via WebSockets and zero reported downtime during peak operations.
- Built and maintained RESTful API integrations for 500+ enterprise clients, ensuring seamless interoperability with third-party systems and reliable data synchronization.
- Improved application and database performance by 40%+ through query optimization, indexing, and caching (Redis) on high-traffic, server-rendered applications.
- Delivered 10+ production web applications across ERP, CRM, HR, logistics, and e-commerce domains, working full-stack from database design through responsive UI implementation.

TECHNICAL SKILLS

- Web Development Stacks: Laravel/PHP (MVC), Node.js, RESTful APIs, GraphQL, Microservices
- Front-End: React.js, JavaScript, TypeScript, HTML/CSS, Bootstrap, Tailwind CSS, SASS, Responsive & Accessible UI Design
- Server-Side Rendering & Templating: MVC patterns, Laravel Blade templating, SEO-friendly server-rendered pages
- Databases: MySQL, PostgreSQL, Redis (caching & queues), Elasticsearch — relational data modeling, query optimization
- Cloud & DevOps: AWS (EC2, S3, RDS), Docker, CI/CD (GitHub Actions, GitLab CI), Linux
- Tools & Practices: Git, GitHub, GitLab, Agile/Scrum (sprint planning, stand-ups, retrospectives), Code Reviews, Debugging & Performance Profiling
- Mobile: Flutter (cross-platform iOS & Android)

WORK EXPERIENCE

Senior Software Engineer — Bander Trading Company

Riyadh, SA | 2023 – Present

- Designed and developed a multi-tenant SaaS web platform using Laravel (MVC architecture), delivering a scalable, secure, and user-friendly system for 7,000+ active users with real-time updates via WebSockets.
- Led end-to-end RESTful API integration of an ERP system with 500+ subscribed enterprise companies, ensuring high availability, seamless data synchronization, and reliable interoperability with external systems.
- Built a full-stack HR Management System covering automated payroll, attendance tracking, and leave management, using server-side MVC templating and a responsive front-end.

- Developed multi-vertical e-commerce platforms with secure payment gateway integration and inventory management, building both back-end logic and responsive UI components.
- Optimized relational database interactions (MySQL) through query restructuring, indexing, and Redis caching, improving average response times by 40%+ on high-traffic endpoints.
- Wrote clean, modular, well-documented code and participated in code reviews to uphold quality standards and support team onboarding.
- Debugged and profiled performance issues across the full stack to ensure application reliability, speed, and responsiveness.
- Established CI/CD pipelines (GitHub Actions, Docker) and deployed applications on AWS, maintaining 99%+ uptime; used Git for version control and participated in Agile ceremonies (sprint planning, stand-ups, retrospectives).

Full-Stack Developer — Smart System

Riyadh, SA | 2022 – 2023

- Developed and enhanced Restaurant Management and Hotel Reservation web systems using Laravel (MVC, server-side templating with Blade) and React.js, improving booking efficiency and operational workflows.
- Designed and built an entrepreneurship platform and multiple corporate websites, managing the full SDLC from system design to production deployment and hosting.
- Built fully responsive, accessible UIs using React, Bootstrap, Tailwind CSS, and SASS, fully integrated with RESTful back-end APIs.
- Collaborated with designers and product managers to translate wireframes into functional, user-centric front-end components.
- Contributed to platform architecture design, code reviews, and performance optimization within Agile/Scrum teams using Git for version control.

Freelance Software Developer — Self-Employed

Remote | 2021 – 2022

- Delivered custom web applications and RESTful API integrations for clients using Laravel/PHP (MVC) and modern JavaScript frameworks.
- Maintained and upgraded legacy server-rendered codebases, improving security, performance, and code quality.

Full-Stack Developer — SKYSOFT

Sanaa, Yemen | 2020 – 2021

- Developed cross-platform mobile applications (Flutter) for School Management, E-commerce, and Hotel Booking systems.
- Integrated mobile applications with RESTful APIs and Laravel/PHP (MVC) back-end services, maintaining responsive UI/UX standards and code quality within Agile teams.

EDUCATION

Bachelor of Information Technology — IBB University, Ibb, Yemen — May 2020

LANGUAGES

Arabic — Native English — Professional Working Proficiency
