dhiaa mostafa Qaid

Senior Full-Stack Engineer & SaaS Architect | ERP & API Integrations | Multi-Tenant Systems | AI Automation | Laravel · .NET · NestJS · React · Flutter
Riyadh, Riyadh, Saudi Arabia

Summary

I'm a Senior Full-Stack Engineer & SaaS Architect specializing in scalable multi-tenant systems, backend engineering, ERP integrations, Middleware architecture, and production-grade APIs. I have a proven track record of turning complex business requirements into reliable, scalable software across SaaS, ERP, logistics, HR, e-commerce, and enterprise systems. At Bander Trading Company, I architected and developed a SaaS logistics platform serving 7,000+ active delivery agents and led Evix ERP integrations for 500+ enterprise clients. I also improved API performance by 40%+ through Redis caching, database optimization, query tuning, and backend architecture improvements. My experience spans web and mobile applications, enterprise platforms, API integrations, Middleware, real-time systems, and payment integrations, connecting business systems and services through reliable integration architectures. I also work with AI and LLM technologies to build intelligent workflows for document processing, structured data extraction, and business automation. I'm passionate about solving complex engineering challenges and building software that delivers measurable performance, reliability, scalability, and business impact.

Experience

Bander Trading Comapny
2 years 9 months

Senior Software Engineer — ERP Integration & Enterprise Systems
February 2025 - Present (1 year 7 months)
Riyadh, Saudi Arabia

✓# Led the architecture and implementation of Evix ERP integrations for 500+ enterprise clients, using RESTful APIs, API Gateway services, and Middleware workflows.

- ✓#Designed and implemented enterprise system integrations and Middleware workflows, connecting ERP, SaaS, payment, and third-party business systems.
- ✓#Developed multi-vertical e-commerce platforms with secure payment gateway integration, inventory management, and business-specific workflows.
- ✓#Designed event-driven integration processes using Redis Queues and asynchronous workers to handle high-volume operations.
- ✓#Delivered scalable enterprise solutions across ERP, logistics, HR, e-commerce, and business systems, focusing on reliability, integration, and maintainability.

Senior Software Engineer — SaaS & Backend Architecture

December 2023 - February 2025 (1 year 3 months)

Riyadh, Saudi Arabia

- ✓#Architected and developed a multi-tenant SaaS logistics platform using Laravel, scaling to 7,000+ active delivery agents with real-time GPS tracking and WebSockets.
- ✓#Designed scalable backend architecture, RESTful APIs, database structures, and asynchronous workflows using Laravel Queues, Redis, and WebSockets.
- ✓#Architected and developed an HR Management System covering attendance, automated payroll, leave management, RBAC, and employee mobile APIs.
- ✓#Improved system performance by 40%+ through Redis caching, database indexing, query optimization, and backend architecture improvements.
- ✓#Implemented Docker and GitHub Actions CI/CD pipelines, automated testing, and production deployment workflows.

Eyein Information Technology

Senior Full-Stack Engineer (Hybrid)

December 2023 - Present (2 years 9 months)

- ✓#Developed and maintained enterprise web platforms, e-commerce solutions, and digital services for corporate, nonprofit, and commercial organizations.
- ✓#Designed and developed scalable backend services and RESTful APIs using Node.js, TypeScript, PostgreSQL, and MongoDB.
- ✓# Implemented secure authentication, RBAC, payment gateways, Tabby integration, and third-party APIs across multiple business platforms.
- ✓#Built real-time features using WebSockets and event-driven architecture, focusing on reliability, performance, and scalability.

✓# Contributed to the full software development lifecycle, including system architecture, API development, database design, frontend integration, testing, optimization, and production deployment.

Freelance

Full-Stack Software Engineer

May 2019 - Present (7 years 4 months)

✓# Delivered custom full-stack web solutions for regional clients, working across a range of projects including AI-powered applications, e-commerce platforms, business applications, and third-party system integrations.

✓# Designed and developed scalable web applications using JavaScript, TypeScript, React, Node.js, and MongoDB, with a strong focus on performance, reliability, and user experience.

✓# Integrated third-party RESTful APIs and external services to connect applications with business platforms and streamline data exchange and workflows.

✓# Optimized application performance, improved frontend responsiveness, and resolved complex database and legacy-system bottlenecks to enhance overall system stability and efficiency.

✓# Worked closely with clients to understand business requirements, translate them into technical solutions, and deliver complete software products from development through deployment.

Smart System

Full-Stack Developer

December 2022 - November 2023 (1 year)

Riyadh, Saudi Arabia

✓# Developed ERP, CRM, Restaurant Management, POS, and Hotel Reservation systems across multiple projects using different technology stacks, including ASP.NET Core, C#, Node.js, NestJS, React, and Laravel.

✓# Designed and developed a multi-tenant SaaS platform, enabling companies to manage independent systems with custom subdomains and separate databases.

✓# Built POS integration solutions connecting sales terminals, menu management, order processing, kitchen workflows, and inventory reconciliation.

✓# Engineered scalable RESTful APIs and backend services using ASP.NET Core, Node.js, NestJS, PostgreSQL, and SQL Server, with a focus on performance, security, and data integrity.

✓# Led the full software development lifecycle across business platforms and corporate solutions, from requirements analysis and system design to development, testing, optimization, and production deployment.

Musanid United

Full-Stack Engineer (Remote Contract)

February 2023 - September 2023 (8 months)

Riyadh, Saudi Arabia

✓#Architected and developed the Musaned United platform using NestJS and Next.js, delivering a scalable production-ready solution.

✓#Designed and implemented RESTful APIs, multi-authentication, and Role-Based Access Control (RBAC).

✓#Integrated payment gateways and third-party APIs to support core business workflows.

✓#Developed responsive web interfaces and connected frontend applications with scalable backend services.

✓#Contributed across the full software development lifecycle, from architecture and development to testing and production deployment.

SKYSOFT

Flutter Developer

February 2020 - September 2022 (2 years 8 months)

Yemen

✓# Developed cross-platform mobile applications using Flutter (Dart) for education, e-commerce, accessibility, and business platforms.

✓# Built and integrated RESTful APIs with mobile applications and web platforms.

✓# Developed Miran, an educational platform supporting students, trainers, and educational services.

✓# Developed Khibrah, a professional services and expertise platform with web and mobile applications.

✓# Contributed to Mubser, an accessibility platform providing digital services for people with visual impairments.

✓# Developed Spare, an e-commerce mobile application for spare-parts sales, including product browsing and purchasing workflows.

✓# Delivered additional web platforms, including SEO Players, with responsive interfaces and API-driven features.
